1. How to use E-Cigar or E-Cigarillo:

It is easy to use:

- Step 1: Unscrew and detach the indicator light cap
- Step 2: Insert the battery into the tube with the negative pole first
- Step 3: Screw back the indicator light cap
- Step 4: Unwrap the cartridge box, take out the cartridge
- Step 5: Screw the cartridge into the tube.

You are ready to enjoy now. When you inhale, the electronic circuit works automatically; the head light turns red, simulating cigar smoking. When you stop inhaling, the electronic circuit stops automatically; and the red light as well as the vapour stops. If the red light of the head becomes weaker, it is the time for you to recharge the battery. When you charge the battery, be aware of the positive and negative poles at the correct ends. The charger works with the normal voltage between 100-240V, 50/60Hz.

After you have used about 20 to 30 days, if you notice the vapour become less with a new cartridge and fully charged battery, you need to reset to the normal working condition. Unscrew, detach and take out the cartridge first, you can use a pin or paper clip; slightly insert into the reset hole and hold for about some seconds

twice, now it is reset to the normal working condition. Please do not reset frequently.
Keep the reset hole away from water.

Please note that the head light for E-Cigarillo is non functional, so that the battery for E-Cigarillo lasts longer than E-Cigar. There is no reset hole for E-Cigarillo as well as for the E-Cigarette, because it is not necessary.

For detailed information regarding how to use the E-Cigar, please refer to the E-Cigar manual. For detailed information regarding how to use the E-Cigarillo, please refer to the E-Cigarillo manual.

2. How to use E-Cigarette or E-MiniCig:

It is easy to use:

- Step 1: Unpack the cartridge box, take out the cartridge
- Step 2: Insert the cartridge into the Atomizer
- Step 3: Screw and connect the battery with the Atomizer.

You are ready to enjoy now. When you inhale it, the electronic circuit works automatically; the head light turns red, simulating cigarette smoking. When you stop inhaling, the electronic circuit stops automatically; and the red light as well as the vapour stops. If the headlight becomes weaker or flashes, it is the time for you to recharge the battery.

To charge the battery, you just screw the battery with the charger. The battery is fully charger when the indicator light turns green from red. The charging time for the first time is should be about 2-3 hours. The charging time for the regular use should be 1-2 hours. The charger works with normal voltage between 100-240V, 50/60Hz.

3. How to use E-Pipe:

It is easy to use E-Pipe:

- Step 1: Take off the pipe lid at the tip of the pipe (put your two fingers: the index and middle fingers, on the pipe lid and turn it in anti-clock direction, unscrew it, then you will detach the lid),
- Step 2: Insert the battery into the battery storage with the negative pole first,
- Step 3: Put back the pipe lid (put your two fingers: the index and middle fingers, on the pipe lid and turn it in clock direction, screw it, then you will fix the lid),
- Step 4: Unwrap the cartridge, pull out the inhaler, insert it into E-Pipe.

Warning: Do not use any metal part to take off the Pipe lid.

You are ready to enjoy now the E-Pipe. When you inhale, the electronic circuit works automatically; the head light turns red, simulating cigar smoking. When you stop inhaling, the electronic circuit stops automatically; and the red light as well as the vapour stops. If the red light of the head becomes weaker, it is the time for you to recharge the battery. When you charge the battery, be aware of the positive and negative poles at the correct ends. The charger works with the normal voltage between 100-240V, 50/60Hz.

After you have used about 20 to 30 days, if you recognize the smoke become less with the new cartridge and full charged battery, you need to reset to the normal working condition. Take out the cartridge first then use a metal object; connect object with copper ring for about 7 seconds twice, it is reset for the normal working condition. Please do not reset frequently.

For detailed information regarding how to use the E-Pipe, please refer to the E-Pipe manual.

4. How to Use E-Pack:

It is easy to use E-Pack:

Step 1: Open the E-Pack, and take out the E-Pack Cigarette

Step 2: Unpack E-Cartridge box, take out E-Cartridge

Step 3: Insert E-Cartridge into E-Pack Cigarette tube

You are ready to enjoy E-Pack now. When you inhale the E-Pack Cigarette, the electronic circuit works automatically; the head light turns red, simulating cigarette smoking. When you stop inhaling, the electronic circuit stops automatically; and the red light as well as the smoke stop. The headlight will flash five times if you inhale continuously for more than five seconds and stop the atomization to protect you from inhaling excessively.

For the detailed information regarding how to use the E-Pack, please refer to the E-Pack manual.

5. How to use USB-eCig:

It is easy to use USB-eCig:

Step 1: Unpack E-Cartridge box, take out E-Cartridge

Step 2: Insert E-Cartridge into E-Cigarette tube

Step 3: Connect the USB-eCig through the USB plug with your computer.

You are ready to enjoy USB-eCig now. When you connect the USB-eCig through the USB plug with your computer, the head light will flash 3 times to confirm you the connection. When you inhale USB-eCig, the electronic circuit works automatically; the head light turns red, simulating cigarette smoking. When you stop inhaling, the electronic circuit stops automatically; and the red light as well as the smoke stop also. The headlight will flash five times if you inhale continuously for five seconds and stop the atomization to protect you from inhaling excessively.

For detailed information regarding how to use the USB-eCig, please refer to the USB e-cig Manual.

Precautions:

- Keep the cartridge or the liquid out of reach of children.
- Do not put excess drops of the liquid at any one time.
- Please keep the cartridge or the liquid in a cool dark place.
- If you do not use your device for a long time, please take out the cartridge.
- Once a cartridge is open, please use it within two weeks.
- E-CIG is designed for the adults who smoke, not for persons under 18 years old or under the legal smoking age in your country, not for pregnant women or other people who are not suitable for smoking.

WARNING: Please keep these products away from children and persons under the age of 18 years.

Thank you for Your Purchase!
